

Vinyl Gloves

Blue Powder-free Vinyl *SafeTouch* Gloves (10x100)

Blue gloves are particularly popular in the food industry because the blue colour stands out easily against most food products and kitchen environments. In areas where safety and hygiene standards are paramount – such as food processing plants – it's crucial that lost or discarded gloves can always be quickly found and removed.

These particular gloves are excellent for working in messy environments, and while their less robust material means they're not as durable as some of the other gloves we offer, their overall cost-efficiency is excellent because they're made using a high quality PVC material. They're also ideally suited to short-term and low-risk applications, and they feature beaded cuff for added strength and easier fitting and removing.

- Protect against cross contamination and widely used in food manufacturing and catering
- Food-grade product
- A 5-year shelf life is longer than most other comparable gloves in the market
- Powder-free for minimal dust contamination
- Tested to comply with EC Council Directive 89/686/EEC Plastic Materials and Articles in contact with food regulations (EU) No 10/2011

Our blue vinyl gloves are an excellent choice for work in the following sectors:

- Food processing industry
- Cleanroom
- Janitorial
- Leisure centres, swimming and sport
- Healthcare and care homes
- Painting and decorating
- Contamination control
- Manufacturing facilities
- All housework

Case quantity: 1,000

Case breakdown: 10 x 100
