

HypaGuard Face Shield in Key Fob

- Be prepared with this convenient mask and storage device
- Porous membrane provides protection from cross infection during resuscitation
- Single use only
- Pictorial resuscitation protocols printed on face shield
- Contained in a compact nylon pouch on a key ring

A nylon pouch key ring containing a CPR face shield. The HypaGuard Flat Face Shield Key Fob has great portability and is available to use when most needed. The porous membrane of the face shield provides protection from cross infection during resuscitation to both the rescuer and the victim. Highly recommended for first aiders but can be used by anyone with CPR knowledge.
